

Francisco Antonio Martín Hersog

Higher Technician in Multiplatform Application Development

+34 689 887 069 · martinherzog.fa@gmail.com · github.com/fcomartin94

PROFESSIONAL PROFILE

Backend developer finishing a Higher Vocational Training Diploma in Multiplatform Application Development, with a background in object-oriented programming (**Java & Spring Ecosystem**, Kotlin) and data analysis (Python, R, SQL). My prior experience in bioinformatics sparked a passion for programming that led me to redirect my career fully towards software development. My personal projects — including a dual-backend REST invoicing API and full ecommerce stores built on WordPress and PrestaShop — are available at **fcomartin94.github.io** and **github.com/fcomartin94**, where I apply distributed architecture principles, REST APIs, and development best practices. I am self-sufficient and take full ownership of my work, but I collaborate naturally when the project calls for it; I pick up new technologies quickly and have also explored the Arduino ecosystem, building small embedded systems that sparked an interest in lower-level programming. Open to any backend or web development role, in Spanish or English.

TECHNICAL SKILLS

Programming & Development

Soft Skills

- Problem solving
- Teamwork
- Fast learner
- Driver's license
- Immediate availability
- Intermediate / professional English

PROFESSIONAL EXPERIENCE

Data and Research Technician

Hospital Universitario Reina Sofía (FIBICO – IMIBIC), Córdoba · 2019 – 2024

Management of clinical databases, resolving incidents in digital platforms (eCRFs) and coordinating workflows across multiple information systems.

ACADEMIC BACKGROUND

Ongoing

Higher Vocational Training in Multiplatform Application Development

2019 – 2025

University Master's Degrees in Bioinformatics & Biostatistics, and Clinical Research (3)

2018

Bachelor's Degree in Biology

ADDITIONAL TRAINING

- Programming for Solutions Applicable to 5G Environments (Virtual Reality, Big Data, IoT, etc.)
- Business Process Integration – ERP / BPM
