FEATURED PROJECTS

Demos & write-ups: fcomartin94.github.io

Catalog Hub API | *Symfony, API Platform, Doctrine, JWT* — 2026
Headless multi-channel product catalog API with role-based authorization.

Stock Sync Hub | *Laravel, MySQL, Redis, Sanctum* — 2026
Multi-channel PrestaShop/WooCommerce sync of products, stock and orders (queued jobs, webhooks).

Google Shopping Feed Export | *PHP, PrestaShop, WooCommerce* — 2026
Native module and plugin generating custom XML feeds for Google Merchant Center.

Coupon Popup (PrestaShop module) | *PHP, PrestaShop, Smarty, JavaScript* — 2026
Welcome-coupon popup for guests; built at Duyal On Line, generic version open-source.

E-commerce Store Builds | *PrestaShop, WooCommerce* — 2026
End-to-end test store setups covering catalog, custom checkout, and shipping integration.

Technical SEO Audit (Real Client Project) | *WordPress, RankMath, Search Console* — 2026
On-page SEO optimization for a real client, boosting performance score from 78 to 91/100.

EXPERIENCE

Junior Web Developer (placement) | *Duyal On Line* — Sep 2026 – Present
Maintain several PrestaShop and WordPress online stores: FTP deployments (FileZilla), SQL queries, fixes to existing modules, and a custom PrestaShop module built and tested locally before production.

Data Technician | *Hospital Universitario Reina Sofía (FIBICO – IMIBIC), Córdoba* — 2019 – 2024
Managed databases and information systems; resolved data incidents with multi-disciplinary teams.

EDUCATION

Higher Vocational Training in Multiplatform Application Development Ongoing
Master's Degree in Bioinformatics & Biostatistics · Bachelor's Degree in Biology
Additional training: 5G programming (VR in C#, IoT in C++, Big Data in Python); self-learning (Java, Cybersecurity).
